To: proshanta sarkar <proshant.cse@gmail.com>

Dear Proshanta,

We had looked at the Android development data in our analysis of XP
2014. One way to extend the work is to look at Android review data.
Please download the data from the link below and install the tables in
your local MySQL server by creating a database called
"android_review_msr2013"

https://www.dropbox.com/s/bz269iqquedumgo/android_review_msr2013.zip

Once you have the database ready, please generate a report as a CSV
file with the following fields:

PersonID
Number of reviews owned by this person
Number of reviews owned by this person that have been approved
Number of reviews commented upon by this person
Total number of comments by this person across all reviews

Regards,

Subhajit
